

Token Sale Agreement

This **Token Sale Agreement** (the “TSA”) shall be entered into by and between *Futuristic Internet Services LLC*, which expression shall, unless it be repugnant to the context or meaning thereof, be deemed to mean and include its successors and permitted assigns (hereinafter referred to as “the Company” or “We”), *a company that is incorporated under the laws of California, US* with principal place of business at 10663-B, Hazelnuts,... #25161 Houston, Texas – 77053 and the purchaser having signed up for the purchase of MaxRoyals Tokens (MRC) during the Token Pre-Sale or the Token Main Sale on the companies’ website <https://www.maxroyalcoin.com> which expression shall, unless it be repugnant to the context or meaning thereof, be deemed to mean and include its successors and permitted assigns (hereinafter referred to as “the Purchaser” or “You”) on the date of its electronic acceptance by Purchaser.

Whereas, Company and Purchaser (hereinafter referred together referred to as “the Parties”) desire to enter into a relationship in which the Company will provide Tokens to be used on the websites and other ventures of the MaxRoyals ecosystem developed by MaxRoyals, Futuristic Internet Services LLC or its affiliated companies (hereinafter collectively referred to as “FISLLC”), as explained in Agreements defined in Terms and Conditions and explained below, in exchange for consideration which has been fixed as published by the Company on its Website and/or any of the documents which make up the Agreements.

Now, therefore, in consideration of the premises, and of the mutual promises and undertakings herein contained, the Parties, intending to be legally bound, do hereby agree as follows:

1. Introduction

- I. This TSA sets forth general rules and procedure of the MRC (‘Token’) Sale by the Company and their purchase by the purchasers. The definitions and terms used in the Agreement will have the meaning assigned to them in the Terms and Conditions (‘T&C’) document.
- II. The parties will agree with all the terms specified in all the Accompanying Documents in addition to the terms specified in this TSA.
- III. Subject to the terms of this TSA and all Accompanying Documents, Company sells and transfers to Purchaser the amount of MRC Tokens subscribed by Purchaser and Purchaser buys the MRC Tokens from Company and accepts their transfer to the ERC 20 compatible wallet specified by Purchaser in the subscription process.

A. GENERAL TERMS

- 1. Please read all the documents which form the Accompanying Documents as specified in the T&C carefully before participation in this Token Sale. Note that Clause 9 of the T&C contains a binding arbitration clause and class action waiver, which, if applicable to you, affect your legal rights. If you do not agree to these terms of sale, do not visit the Website and Use the Tokens in any manner and also do not participate in the Sale of the Tokens.
- 2. The Token is not a financial or securities instrument. It is proprietary software made for mere participatory access to the websites and other platforms within the MaxRoyals FISLLC ecosystem and certain other limited rights as specified in this document or Accompanying Documents.
- 3. The purchase of Tokens is not in any way a purchase of equity in/ or debt from the Company or its associated entities.
- 4. The Tokens are issued at the sole discretion of the Company on submission of the requisite payment, completion of identification procedure, submission of necessary documents and fulfillment of all terms specified in all documents included in ‘Agreements’ as specified in

Clause 2(d) of the T&C. The Company may refuse to allocate or sell any Tokens even on fulfillment of all conditions without assigning any reason thereof.

B. DISCLAIMER:

- 1. We have consulted with our legal counsel, and have been advised that our token or its related sale is not considered a security. We are operating as a company selling Tokens that will be used within FISLLC ecosystem of cryptocurrency mining. If we determine that any service offering does fall within the scope of a regulation we will be applying to have it regulated in our respective jurisdiction once the token sale has closed. Our Token is not a security since it is simply a form of payment we will be accepted on the FISLLC ecosystem relative to the crowdsale - users have no rights attached to the Token, outside of the participation access provided by ownership of the token and limited rights provided under this TSA or Accompanying Documents. The Token sale and the businesses in the FISLLC operates are separate for all sakes and purposes.
- 2. This is not an investment product. This document does not constitute investment advice or counsel or solicitation for investment in any security and shall not be construed in that way.
- 3. This document does not constitute or form part of, and should not be construed as, any offer for sale or subscription of, or any invitation to offer to buy or subscribe for, any securities, nor for the Tokens.
- 4. This is not a company share stock/derivative. It is a sale of a digital asset.
- 5. The purchase price of the Tokens are quoted for the token sale and sale only and may change or vary in the future or maybe be changed by the Company without any prior intimation.
- 6. The payment for the Tokens may be made by Users only in the cryptocurrencies or specified fiat currency in the manner specified in the Website and/or any of the Agreements.
- 7. The Tokens offer no rights to profits of the Company.
- 8. The Tokens are not designed or disingenuously devised to acquire stock or money, or any expectation of profits.
- 9. The Tokens may or may not be listed on various secondary markets for trading, however such trading is incidental and non-consequential to the primary purpose and the actual utility of the Token as specified in the Website and Accompanying Documents.
- 10. The Company expressly disclaims any and all responsibility for any direct or consequential loss or damage of any kind whatsoever arising directly or indirectly from: (i) reliance on any information contained in this document, the MRC whitepaper; the Website; the Agreements; and (ii) any error, omission or inaccuracy in any such information or (iii) any action resulting therefrom.
- 11. Any usage of term “currency” is a general term associated with internal ledger and reward system, built into the MRC software protocol; as it relates to the internal market value within the FISLLC ecosystem. The Company, and the FISLLC Group expressly disclaim any representation that MRC seeks to operate as an instrument of interstate commerce, “money”, or monetary instrument regulated by relevant governmental authorities inside or outside of the United States.
- 12. By purchasing tokens from any country during the sale period and/or using them in connection with the platforms (as defined below), you will be bound by this TSA and all terms incorporated by reference.
- 13. The TSA or any of the Agreements will not be interpreted against one party merely as it was drafted by the party.
- 14. The Annexures ‘A’, ‘B’ and ‘C’ are integral part of this TSA and should be read together.

- 15. Declaration by Purchaser: I agree to the above terms and disclaimers required to receive MRC Tokens during this Token Sale. I also declare that I am at least 18 (Eighteen) years old, not from a Restricted State and am competent to provide valid consent to the same as per the laws applicable to me.

Annexure A

Description of Company, Network and Tokens 1. Overview of Company and Affiliates

The *Futuristic Internet Services LLC*, is a business company incorporated in Delaware, US which has been formed to conduct and oversee the MRC Token Sale.

2. Overview of Network and Services

MRC is a token that will be used within FISLLC ecosystem of cryptocurrency mining and other ventures by the FISLLC Group. Futuristic Internet Services LLC deals into data center services provides cloud hosting services to its customers across the globe. MaxRoyals mining platform would become an integral part of FISLLC ecosystem offering blockchain cloud data center related services

Annexure B

Token Sale Procedures and Specifications 1. Token Price

The price will be 0.015 USD =1 MRC for the procedures set forth in Section 3 of this Annexure B. Company reserves the right to lower the price per Token, at its sole discretion, during the Sale Period.

2. Commencement, Duration and Completion of Token Sale

The Company will conduct a token Pre-Sale during a period (the "Pre-Sale Period"), which will on 26th Feb 2018 (the "Launch Date") and end on 28th Feb 2018 or earlier as decided by the Company. The Pre-Sale will be followed by the Token Main Sale to be conducted in a period (the "Main Sale Period") which will begin on 6th March 2018 and end on 24th May 2018 or earlier as decided by the Company. The period from the Launch Date until the end of the Main Sale is hereinafter referred to as "Sale Period".

If less than 1 million MRC are sold by the termination of the Main Sale Period (the "**Minimum Threshold**"), the Smart Contract System will not deliver Tokens and will instead return the payment received from purchasers to the return addresses provided by purchasers (as discussed further below). In that circumstance, Company will have no further obligations to purchasers, under these Terms or any other agreement, after such purchasers' contribution is sent to the return address provided or the address from which the funds were received.

3. Procedures for Buying and Receiving Tokens

To purchase Tokens during the Sale Period, you must have certain token wallets established and operational. Specifically, you must have: (i) a cryptocurrency wallet supporting Bitcoin, Bitcoin Cash, Ether, Dash or Litecoin if you wish to purchase the Tokens using cryptocurrency or a Fiat currency payment medium (Credit Card/ Bank Transfer) and (ii) an Ethereum wallet that supports the ERC20 token standard in order to receive Tokens that you purchase from the Company. Company reserves the right to prescribe additional guidance regarding specific wallet requirements.

At the Launch Date, Company will make available a web application to facilitate your purchase and receipt of Tokens. If you wish to purchase Tokens, you must provide your crypto currency wallet

address or bank account details on the web application as a return address. Company is collecting return addresses so that it may return the payment in case the Minimum Threshold is not reached (as described in Section 2 of this **Annexure B**) or in the event that unforeseen circumstances otherwise cause Company to decide to not proceed with the sale of Tokens. Second, you will need to provide an Ethereum ERC20 compatible wallet address for the delivery of Tokens you purchase via the Smart Contract System. Company may also request certain optional information, such as an email address, through the web interface. Once the Company has received deposit from you, the Company will authorize the Smart Contract System to deliver Tokens to the Ethereum ERC20 wallet address that you provided to Company for delivery of the Tokens.

The Company anticipates that delivery of Tokens from the Smart Contract System to purchasers will occur within one week after the Sale Period concludes, but reserves the right to delay delivery up to four weeks after the conclusion of the Sale Period. Although the Company does not anticipate any security issues arising from the sale of Tokens, this four week timeframe is intended as a precautionary buffer period for Company to resolve any such security issues.

4. Tokens to be Sold

The Company anticipates selling approximately 45,000,000 Tokens during the Sale Period out of which 60,000,000 MRC are proposed to be sold in the pre-sale and 10,000,000 in the Main sale. The Tokens to be sold during the Sale Period will be from a pool of Company-owned Tokens transferred from the Company Custodial Wallet to the Smart Contract System.

A total of 60 Million MRC will be produced.

5. Tokens Retained by Company

The Company will own approximately 20% of the total MRC produced (the "**Retained Tokens**") after the sale is completed. They are divided into different heads contemplated for distribution as stated below. Although it has no plans to do so at this time, the Company reserves the right to burn Retained Tokens at any point during or after the Sale Period.

6 Use of Proceeds from Token Sale

The company is planning to establish green mega data centers with the total cost of \$10 Million and this is how company plans to achieve its numbers.

Distribution

The total group of 60 Million MRC is proposed to be distributed as follows

- Pre-sale: 10%
- Management : 5%
- Bounty: 2%
- Partners: 5%
- Ecosystem: 1.5%
- Main Token Sale: 65%
- Referral Program: 2.5%
- Reserved for Partners: 8%
- Free Reserves: 1%

65% of the Bounty Tokens shall be locked up for 6 months.
100% of the Team Tokens will be locked up for 12 months.

The envisioned expenditures and areas of development described above are provided for illustrative purposes only, and Company reserves the right to allocate its resources, including proceeds from the sale of Tokens as well as Retained Tokens at its sole discretion.

Annexure C

Certain Risks Relating to Purchase, Sale and Use of Tokens

***Important Note:** As noted elsewhere in these Terms, the Tokens are not being structured or sold as securities or any other form of investment contract or product. Accordingly, none of the information presented in this Annexure C is intended to form the basis for any investment decision, and no specific recommendations are intended. Company expressly disclaims any and all responsibility for any direct or consequential loss or damage of any kind whatsoever arising directly or indirectly from: (i) reliance on any information contained in this Annexure C, (ii) any error, omission or inaccuracy in any such information or (iii) any action resulting from such information.*

By purchasing, holding and using Tokens, you expressly acknowledge and assume the following risks:

1. Risk of Losing Access to Tokens Due to Loss of Private Key(s)

A private key, or a combination of private keys, is necessary to control and dispose of Tokens stored in your digital wallet or vault. Accordingly, loss of requisite private key(s) associated with your digital wallet or vault storing Tokens will result in loss of such Tokens. Moreover, any third party that gains access to such private key(s), including by gaining access to login credentials of a hosted wallet service you use, may be able to misappropriate your Tokens.

2. Risks Associated with the Ethereum Protocol

Because Tokens and the Network are based on the Ethereum protocol, any malfunction, breakdown or abandonment of the Ethereum protocol may have a material adverse effect on the Network or Tokens. Moreover, advances in cryptography, or technical advances such as the development of quantum computing, could present risks to the Tokens and the Network by rendering ineffective the cryptographic consensus mechanism that underpins the Ethereum protocol.

3. Risk of Mining Attacks

As with other decentralized cryptographic tokens based on the Ethereum protocol, the Tokens are susceptible to attacks by miners in the course of validating Token transactions on the Ethereum blockchain, including, but not limited to, double-spend attacks, majority mining power attacks, and selfish-mining attacks. Any successful attacks present a risk to the Network and the Tokens, including, but not limited to, accurate execution and recording of transactions involving Tokens.

4. Risk of Hacking and Security Weaknesses

Hackers or other malicious groups or organizations may attempt to interfere with the Network or the Tokens in a variety of ways, including, but not limited to, malware attacks, denial of service attacks, consensus-based attacks, Sybil attacks, smurfing and spoofing. Furthermore, because the Network is based on open-source software, there is a risk that a third party or a member of the Company team may intentionally or unintentionally introduce weaknesses into the core infrastructure of the Network, which could negatively affect the Network and the Tokens.

5. Risks Associated with Markets for Tokens

The Tokens are intended to be used solely within the Network, and Company will not support or otherwise facilitate any secondary trading or external valuation of Tokens. This restricts the contemplated avenues for using Tokens to the provision or receipt of Services, and could therefore create illiquidity risk with respect to the Tokens you hold. Even if secondary trading of Tokens is facilitated by third party exchanges, such exchanges may be relatively new and subject to little or no regulatory oversight, making them more susceptible to fraud or manipulation.

Furthermore, to the extent that third parties do ascribe an external exchange value to Tokens (e.g., as denominated in a digital or fiat currency), such value may be extremely volatile and diminish to zero.

6. Risk of Uninsured Losses

Unlike bank accounts or accounts at some other financial institutions, Tokens are uninsured unless you specifically obtain private insurance to insure them. Thus, in the event of loss or loss of utility value, there is no public insurer, such as the Federal Deposit Insurance Corporation, or private insurance arranged by us, to offer recourse to you. We will not be responsible for loss or theft of your tokens

7. Risks Associated with Uncertain Regulations and Enforcement Actions

The regulatory status of the Tokens and distributed ledger technology is unclear or unsettled in many jurisdictions. It is difficult to predict how or whether regulatory agencies may apply existing regulation with respect to such technology and its applications, including the Network and the Tokens. It is likewise difficult to predict how or whether legislatures or regulatory agencies may implement changes to law and regulation affecting distributed ledger technology and its applications, including the Network and the Tokens. Regulatory actions could negatively impact the Network and the Tokens in various ways, including, for purposes of illustration only, through a determination that Tokens are a regulated financial instrument that require registration or licensing. Company may cease operations in a jurisdiction in the event that regulatory actions, or changes to law or regulation, make it illegal to operate in such jurisdiction, or commercially undesirable to obtain the necessary regulatory approval(s) to operate in such jurisdiction.

8. Risks Arising from Taxation

The tax characterization of Tokens is uncertain. You must seek your own tax advice in connection with purchasing Tokens, which may result in adverse tax consequences to you, including withholding taxes, income taxes and tax reporting requirements.

9. Risk of Alternative Networks

It is possible that alternative networks could be established that utilize the same open source code and protocol underlying the Network and attempt to facilitate services that are materially similar to the Services. The Network may compete with these alternative networks, which could negatively impact the Network and Tokens.

10. Risk of Insufficient Interest in the Network or Distributed Applications

It is possible that the Network will not be used by a large number of individuals, companies and other entities or that there will be limited public interest in the creation and development of distributed ecosystems (such as the Network) more generally. Such a lack of use or interest could negatively impact the development of the Network and therefore the potential utility of Tokens.

11. Risks Associated with the Development and Maintenance of the Network

The Network is still under development and may undergo significant changes over time. Although we intend for the Tokens and Network to follow the specifications set forth in Annexure A, and intend to take commercially reasonable steps toward those ends, we may have to make changes to the specifications of the Tokens or Network for any number of legitimate reasons.

This could create the risk that the Tokens or Network, as further developed and maintained, may not meet your expectations at the time of purchase. Furthermore, despite our good faith efforts to develop and maintain the Network, it is still possible that the Network will experience malfunctions or otherwise fail to be adequately developed or maintained, which may negatively impact the Network and Tokens.

12. Risk of an Unfavorable Fluctuation of Ether and Other Currency Value

The Company team intends to use the proceeds from selling Tokens to fund the maintenance and development of the Network, as described further in **Annexure B**. The proceeds of the Token sale will be denominated in USD, and converted into other cryptographic and fiat currencies. In addition, some sales of the Tokens may also be denominated in other fiat or crypto currencies. If the value of Ether or other currencies fluctuates unfavorably during or after the Sale Period, the Company team may not be able to fund development, or may not be able to develop or maintain the Network in the manner that it intended.

13. Risk of Dissolution of the Company or Network

It is possible that, due to any number of reasons, including, but not limited to, an unfavorable fluctuation in the value of USD (or other cryptographic and fiat currencies), decrease in the Tokens' utility, the failure of commercial relationships, or intellectual property ownership challenges, the Network may no longer be viable to operate and the Company may dissolve.

14. Risks Arising from Lack of Governance Rights

Because Tokens confer no governance rights of any kind with respect to the Company, all decisions involving the Company will be made by Company at its sole discretion, including, but not limited to, decisions to create and sell more Tokens for use on the FISLLC ecosystem, or to sell or liquidate the Company. These decisions could adversely affect the FISLLC ecosystem and the Tokens you hold.

15. Risks Involving Mining Platform

As the FISLLC provides services, which are linked to large number of mining transactions and cryptocurrencies, the Services may involve the transfer and storage of large amounts of sensitive and/or proprietary information, which may be compromised in the event of a cyber- attack or other malicious activity. Similarly, the Services may be interrupted and files may become temporarily unavailable in the event of such an attack or malicious activity. Because users can use a variety of hardware and software that may interface with the Network, there is the risk that the Services may become unavailable or interrupted based on a failure of interoperability or an inability to integrate these third-party systems and devices that the FISLLC does not control with the FISLLC Services. The risk that the Services may face increasing interruptions and the Network may face additional security vulnerabilities could adversely affect the Network and therefore the future utility of any Tokens that you hold.

16. Unanticipated Risks

Cryptographic tokens such as the Tokens are a new and untested technology. In addition to the risks included in this **Annexure C**, there are other risks associated with your purchase, holding and use of

Tokens, including those that the Company cannot anticipate. Such risks may further materialize as unanticipated variations or combinations of the risks discussed in this **Annexure C**.
